Professional experience

2025 - 2026

Freelance Developer

I am presently engaged in a range of freelance projects, utilizing various technologies including WordPress/Elementor, Elementor Pro, React, HTML, CSS, and JavaScript.

2024

Disalvo - Trucks (<https://disalvocourierservice.com>)

Frontend website development and maintenance - level 1. This website was created using WordPress in collaboration with QA Digital ADS.

We real state (<https://qadigitalads.com/>)

Website design and development.

Design and development of an SEO-optimized website for a beachfront real estate firm in Mexico. I utilized WordPress (Elementor and Elementor Pro), JavaScript, Figma, Photoshop, and Illustrator, achieving a high degree of detail and a visually compelling aesthetic.

QA Digital Ads (<https://qadigitalads.com/>)

Website development in English utilizing WordPress CMS and Expression Engine. Website development in React tailored to client specifications. Level 1, 2, and 3 websites, incorporating animations and interactions through CSS and JavaScript.

2023

Encosmic Metaverse (<https://www.encosmic.site/>)

Design, development, and maintenance of the comprehensive Cosmic Metaverse. Employing various backend technologies, including Node.js, Python, PHP, and JavaScript, alongside frontend technologies such as React and WordPress.

Currently in development: virtual school, WooCommerce store, forum page, metaverse interactions including 3D and 2D augmented reality, multiplayer video game development, advanced chatbot, and more.

Lucho's Bodegón (www.elbodegon59.com)

Development, and maintenance of a frontend e-commerce website. This website was created using React Hook and includes a QR code payment section, a landing page, and a games section.

El Desvío Restobar (www.eldesviorestobar59.com)

Development, and maintenance of a frontend e-commerce website. This website was created using React Hook and includes a QR code payment section, a landing page, and a games section.

2022

Monastery NFT (www.monasterynft.com)

Website design and development.

This responsive website offers an audiovisual experience, 3D augmented reality interactions, and is accessible in both English and Spanish. The project was developed utilizing HTML, CSS, and JavaScript.
